

BT-550-E

## Double Body Press

BT-550-E makes an epoch for a robe coat finisher.

### The simultaneous finishing to a trunk and a sleeve

---

- Achieved quick and high quality finishing with heat wind drying to both sides of trunk in addition to a large iron.
- It is possible to run this product by the number of operator from one to three flexibly according to the number of the finishing to clothes.

### Excellent effect coming from original own design developed for the first in the world

---

- Improves working efficiency significantly with the world first moving dummy equipment and the machine layout.
- As well, improves productivity per hour because a garment can be placed on one dummy while the other dummy is under press process.
- Newly equips with the function to adjust the sleeve angle and the backstroke.

### Significant reduction of cost, space, and working time

---

- Reduces occupation space significantly. Working efficiency is expected to be improved concurrently with securing a working space.
- Possible to achieve time saving via easy to replace a pad, a cover and an airbag.
- Reduces an operator's burden via less complex process thanks to high functional design.

# MAJOR SPECIFICATION

## Integrated Technology for the Machine

Model number	BT-550-E	
Product name	Double Body Press	
Power supply	3phase AC400V	
Apparent power	6.46 KVA	
Motor capacity	Vacuum	1.3/1.5Kw (50/60Hz) × 2
Driving Power	Airbag	0.85/0.95 Kw (50/60Hz)
Vacuum	Sleeve	0.75Kw (50/60Hz)
Steam	Standard use	0.5MPa
	Max. Supply	0.7MPa
	Inlet φ	3/4"
	Outlet φ	1/2"
Air	Consumption	45L/time (ANR)
	Standard use	0.5MPa
	Max. supply	0.9MPa
	Inlet φ	1/2"
Max. external dimension	Width	2379mm
	Depth	1668mm
	Height	1616mm
Exhaust tube	1 1/2" × 2	
Weight	910kg	

\*Specification set forth on this catalogue is subject to change without prior notice.

[Buck-Dimension]

[Status of the backstroke]

[Status of the backstroke]

Stretch out wrinkles on the rear side of clothes by pressing this area. High quality finishing with less wrinkles can be achieved in parallel with improving working efficiency.

[In time of pressing Y-shirt]
